

Product Documentation (2018-11-27)

System requirements: pCon.update

Minimum requirements for DataClient and DataPool

Processor:	x86 or x86-64 at 1 GHz
System memory:	1 GB
Operating system:	Windows 7 or higher (32 or 64 bit) Windows Server 2008 or higher (32 or 64 bit)
Available disc space:	1 GB ¹
Graphics board:	Any
Screen resolution:	1024 x 768 pixels
Internet access:	1 Mbit/s (recommended: 10 Mbit/s)
Security software (firewall etc.):	Usually DataClient and DataPool operate in conjunction with security software without any difficulty. In case of very restrictive security software, it must be ensured that access to *.easterngraphics.com and *.pcon-solutions.com (each 80, 443, respectively) is enabled and download and installation of any files from these servers is possible. If the automatic installation is used, this also applies to the user account used for this purpose (the SYSTEM account by default).
PDF Viewer:	Recommended (For viewing update information)

Minimum requirements for pCon.update web site

The web site is required for user registration and management of the pCon.update user accounts.

Operating system:	Windows 7 or higher (32 or 64 bit) Windows Server 2008 or higher (32 or 64 bit)
Browser:	Google Chrome 64 or higher Firefox 57 or higher Edge 44 or higher
Screen resolution:	1024 x 768 pixels
Internet access:	1 Mbit/s
Security software (firewall etc.):	The browser must be able to access *.easterngraphics.com and *.pcon-solutions.com via HTTP/HTTPS (ports 80, 443).

¹ The required disk space depends of the amount of programs and OFML data to be installed. Besides the disk space of the programs or OFML data itself temporary disk space for the installation files is required.
